INFORMED CONSENT TO CHIROPRACTIC CARE:

You understand that the chiropractic adjustment is used to correct dysfunctions of the spine involving the joints, muscles and nerves that is called a subluxation.

You consent to the performance of a spinal examination in which the doctor uses their hands to feel the muscles and joints of the spine or other body parts (palpation), performs a visual inspection of your posture, checks the ability to move through a normal range of motion for spinal or other body parts, and performs any further orthopedic or neurological tests. X-rays or other imaging may be ordered by the chiropractor.

The tests and spinal adjustments are standard and commonly used. They involve very little risk and serious side effects are rare. Some patients may have muscle soreness after chiropractic adjustments or after performing standard physical exam tests.

Spinal adjustments have been used routinely in the management of patients with a variety of symptoms and/or disorders, including those without symptoms who want to improve overall health. Chiropractic is considered part of a wellness lifestyle. I have read and understand this informed consent and I consent to chiropractic examination and care.

PERMISSION & AUTHORIZATION FORM REGARDING THE USE OF NUTRITION RESPONSE TESTING:

I specifically authorize the natural health practitioners at Hager Health and Natural Wellness Center, LLC to perform a Nutrition Response Testing health analysis and to develop a natural, complementary health improvement program for me which may include dietary guidelines, nutritional supplements, etc. in order to assist me in improving my health, **and not for the treatment or "cure" of any disease.**

I understand that **Nutrition Response Testing is a safe, non-invasive, natural method** of analyzing the body's physical and nutritional needs, and that deficiencies or imbalance in these areas could cause or contribute to various health problems.

I understand that Nutrition Response Testing is not a method for "diagnosing" or "treating" of any disease including conditions of cancer, AIDS, infections, or other medical conditions and that these are not being tested for or treated.

No promise or guarantee has been made regarding the results of Nutrition Response Testing or any natural health, nutritional or dietary programs recommended, but rather I understand that Nutrition Response Testing is a means by which the body's natural reflexes can be used as an aid to determining possible nutritional imbalances, so that safe natural programs can be developed for the purpose of bringing about a more optimum state of health.

I have read and understand the foregoing. This permission form applies to subsequent visits and consultations.
